

FMH RapidScreen

Results you can trust

Trust is a precious thing. Immucor's dedication to innovation means we are committed to delivering enhanced products that improve your laboratory's operations.

FMH RapidScreen offers a more simplified feto-maternal hemorrhage screening test to give you peace of mind in generating an improved result for the protection of mothers and their newborns.

Transfuse | Transplant | Transform **a life**

FMH RapidScreen

Immucor's faster, easier feto-maternal hemorrhage screening test.

FMH RapidScreen offers key improvements over currently available fetal screen kits

Faster, easier test procedure

- 5 minute, room temperature incubation
- Fewer microscopic fields simplifies the reading and interpretation of test results
- Up to 35% decrease in total test time compared to currently marketed tests
- Minimizes the need to carry out a quantitative procedure in all cases and can be performed within the blood bank laboratory

More consistent performance

- Monoclonal IgM Anti-D antibodies replace chemically modified polyclonal antibodies for improved performance
- Elimination of enzyme-treatment to the indicator cells aids in reduction of false positive test results

Ordering Information

Product Code	Description	Size	Use
0007893	FMH RapidScreen	1 Kit (30-35 tests)	Detection of D+ red cells in D- mothers post-delivery
